+91 8431569947

PROFESSIONAL SUMMARY:

Results-driven Mainframe Developer with 4+ years of experience in designing, developing, and maintaining enterprise applications using COBOL, JCL, DB2, VSAM, and SQL. Experienced across all phases of the Software Development Life Cycle (SDLC), including development, testing, deployment, production support, and maintenance. Possess hands-on experience in legacy-to-cloud migration projects with exposure to AWS services such as EC2, Step Functions, Glue, and S3. Familiar with leveraging GenAI tools, GitHub Copilot, and automation solutions to improve development productivity and documentation processes. Strong analytical, troubleshooting, and problem-solving skills with domain expertise in banking and insurance applications

PROFESSIONAL EXPERIENCE:

Currently working as a Senior Associate Consultant at Infosys since June 2025, driving development, enhancement, legacy modernization and support of enterprise-scale Mainframe applications. Previously served as an Associate Consultant at Capgemini from March 2022 to June 2025, contributing to application development, production support. action-oriented strong expertise in Application development, maintaining system stability, implementing enhancements, and delivering high-quality solutions within large-scale enterprise environments across Banking and Insurance domains

TECHNICAL SKILLS:

Programming	: COBOL, JCL, SQL, PL/I
Databases	: DB2, VSAM
Mainframe Tools	: Endevor, File-Aid, JSCAN, IDz
Debugging	: Abend-AID, Xpeditor
Batch Tools	: CA7, SAR, SAVERS
Enterprise / Internal Tools	: XINFO, DMR, CCS, SPIDOC, OPPC
Cloud	: AWS (EC2, S3, Glue, Step Functions, Athena)
Tools	: Git, GitHub Copilot, VS Code, JIRA, Confluence

PROFESSIONAL EXPERIENCE:

Duration: 29/03/2022 to till date

 **Company: Infosys**

Duration: 23/06/2025 to till date

1. Project: Regulatory Reporting [Client: Danske]

Danske Bank is a leading financial services group in the Nordic region, headquartered in Copenhagen, Denmark. It serves around 5 million personal and business customers across Northern Europe, offering a wide range of banking and financial services. In 2025, the bank reported strong financial results with annual revenue of approximately €7–8 billion and a net profit of about €23 billion DKK (~\$3+ billion), reflecting its stable performance and continued growth.

Role and Responsibilities:

- Collaborated with Product Owners (PO) to gather and analyze requirements, ensuring accurate understanding of business needs and system changes.
- Implemented program changes and scheduling updates, monitoring system performance to ensure stability post-decommissioning.
- Analyzed COBOL/PL1 programs and JCLs to understand workflows, data flow, and system integrations.
- Created detailed technical documentation to support legacy system understanding and cloud migration initiatives.
- Supported data migration pipelines using GitHub & AWS services, enabling scalable data processing and analytics.
- Analyzed and decommissioned legacy mainframe jobs and files by identifying dependencies, ensuring safe removal of obsolete components.
- Monitored and optimized job performance, addressing runtime delays and system inefficiencies to ensure smooth operations.
- Provided production support by resolving incidents related to JCL, DB2, and application errors, minimizing downtime.

- Conducted root cause analysis for production issues and collaborated with cross-functional teams to implement effective solutions.

Environment: Mainframe, AWS
Languages: Cobol, JCL, DB2, PL/1 & SQL

Company: Capgemini

Duration: 29/03/2022 to 06/10/2025

2. Project: Assurant PMS Claims Apps [Client: Assurant]

Assurant is one of the fortune 500 company established in 1982 headquartered in New York. The company provides property and casualty insurance and services over 300 million customers worldwide. I was part of team Exceed, where we were responsible for managing policy and billing operations.

Role and Responsibilities:

- Collaborated with product owner and system architects to understand system requirements and analysing the business requirements
- Utilized JCL and executed the batch jobs on mainframe systems to process data and transactions.
- Created, tested, and debugged COBOL-DB2 code ensuring efficient and error-free execution of program.
- Developed and maintained COBOL-DB2 applications for insurance [Vehicle contracts, housing policies, renters' insurance, flood policies].
- Adhered to timelines to meet quality assurance targets.
- Participated in software testing, including unit testing to validate the functionality and reliability of applications.
- Bug fixes and issues resolution in daily support activity: Successfully diagnosed debugged and resolved software issues in production and other lower environments.
- Solved complex tickets with Root Cause Analysis (RCA) and providing solution to business and implementing the fixed code changes after testing.
- Bill error resolution: Fixing the policies which will error out in daily batch process.

Environment: Mainframe
Languages: Cobol, JCL, DB2, VSAM, CICS & SQL

EDUCATIONAL BACKGROUND

 **NMAM Institute of Technology Nitte, SH1, Karkala, Udupu, Karnataka.**
Bachelor of Engineering, Civil Engineering – 2019 – Aggregate 8.6

CERTIFICATIONS:

- Certified SAFe 6 Practitioner.
- Infosys certified AWS cloud Practitioner.
- Infosys Global Agile Certification.
- Led my team to the state level during academics – Project was funded by Karnataka state government.
